

## Introduction to HTML CSS

### Assignment 1

Follow the instructions in Module 1 of "Introduction to HTML and CSS" to create a folder named "Assignment1" and build a website with the following features:

1. Create an index.html page.
2. Create a project.html page.
3. Create a blog.html page.
4. Add an H1 heading to each page with the page title.
5. Add 3 links on each page (Home, Project, Blog) to connect each page to the others.

#### Within the index page:

- Create a paragraph with sample text. In that paragraph, make part of the text bold using the `<strong>` tag.
- Place 3 images on the page.
- Create an unordered list with 3 items: Address, Email, and Mobile. Within the Mobile item, create an ordered list with links to social media platforms (LinkedIn, Facebook, Instagram, Twitter) as shown below:
  - **Address:** New York
  - **Mobile:** 555-555-555
  - **Email:** farnaz.towhidi@gmail.com
  - **Social Media:**
    1. LinkedIn
    2. Facebook
    3. Instagram
    4. Twitter

---

## Within the blog page:

On the blog page, add two <div> elements and one <span> element with sample text.

[My social Media](#) [My projects](#) [Find Me](#) [My blog](#) [Page Me](#)
